

ACURA CHARGING PACKAGE DETAILS FOR SALES CONSULTANTS

GO ELECTRIC. GO ZDX.

Electrified performance makes its Acura debut with the all-electric ZDX and ZDX Type S, arriving in 2024. With convenient charging options at home or on the go and an anticipated range rating of 313 miles*, the all-electric ZDX effortlessly fits into an everyday routine.

** Anticipated combined (city/highway) 313 mile EPA driving range rating for ZDX A-Spec single-motor configuration with a full charge based on internal testing; ZDX A-Spec dual-motor configuration – anticipated 304 mile rating; ZDX Type S – anticipated 278 mile rating. Your driving range will vary depending on driving conditions, how you drive and maintain your vehicle, battery-pack age/condition, and other factors.*

CHARGING YOUR ZDX

Acura understands that one size does not fit all when it comes to charging. Depending on your client's housing type, driving behavior, and charger availability, there is a suitable charging solution just for them. ZDX drivers will have a choice of home and public charging. ZDX drivers can select one charging solution package to be included with their ZDX purchase.**

***Additional installation costs can vary based on charger location; the need for a panel upgrade; and other factors. Installation credits are available for clients who select the Home Charging Bundle and Portable Charging Bundle.*

CHARGING SOLUTIONS FOR THE ZDX (HOME CHARGER / PUBLIC CHARGING)

	HOME CHARGING BUNDLE* Home Charging Station 	PORTABLE CHARGING BUNDLE* Portable Charging Kit  OR 		EVGO PUBLIC CHARGE CREDIT** DC Fast Charging – ZDX  + EVgo Roaming Partners

*The Acura EV app will be available in February 2024 in the Apple App Store and Google Play Store.

STEPS TO COMPLETE HOME CHARGER INSTALLATION

Whether you plan to charge in a garage or driveway, the Acura Home Charging Station is a convenient and cost-effective option to power your ZDX. Investing in a personal charging station guarantees you access to the fastest home charging available.

Connect with an Acura Home Electrification installer to ensure a seamless setup and safe EV charging.

INSTALLATION PROCESS

- 1. Log On and Get an Instant Quote:** Go to Acura Home Electrification (homeelectric.acura.com) and type the client's address in the search bar, and select EV Charger. Then the client will be asked to create or log into an Acura account. Have your client answer some questions about their home to get an estimated quote*. This should take about fifteen minutes.
- 2. Instantly Match with a Verified Installer:** After submitting the project, the client will be provided with installer options in their area.
- 3. Your Installer Will Help You Prepare for Installation:** The pre-screened and vetted local installer will review your client's project details and will call the client within two business days for a consultation to gather additional project or property details.
- 4. Schedule and Complete Installation:** Once the project permit is approved, the installer will schedule the installation with the client based on their availability. If the client is installing for a new EV, Acura recommends the customer to schedule the EV charger installation before the client's vehicle arrives or shortly after.

*Most projects cost around \$500 to \$3,000.

STEPS TO ACCESS PUBLIC CHARGE CREDITS

1. Download the Acura EV App
2. Open the App—Sign into your Acura Account
3. Tap on "Welcome to the EV Community" card to set up your EVgo account
4. Sign up or Login to EVgo
5. Link your EVgo account and enjoy your credits!*

*The client's EVgo charge credits may not show up immediately, as it is contingent upon the proper recording of the ZDX sale via RDR. There may be a delay (up to one week) after the ZDX sale for credits to show up on the client's account. Client must redeem credits within three (3) years.

Welcome to the EV community

Setup with your favorite charging network and get free charge credits.
